Research

Highly relevant to the quality of people’s lives, interdisciplinary research within SFWS contributes to the development of policy and management strategies for land use, public health, and natural resources within Alabama, across the region, and around the globe.

HIGHLIGHTS

- Over 125 faculty members, research professionals, and graduate students actively engaged in research
- Consistently ranks within the top two units on campus for extramural funding per faculty member
- Internationally renowned graduate program
- Multi-national research enterprise
- 36 research faculty
- 3.3 publications per faculty member per year
- 9 affiliated centers and cooperatives

GRADUATE DEGREES

- Forestry – MS, MNR, PhD
- Natural Resources, MS & MNR
- Wildlife Sciences – MS, PhD
- Applied Economics – PhD

GRADUATE CERTIFICATES

- Online Professional Certificates (Pending ACHE approval)
  - Restoration Ecology
  - Forest Finance & Investment
  - One-Health

RESEARCH AREAS

- Bioenergy
- Climate science modeling
- Deer management
- Environmental health of humans and animals
- Feral hog control
- Forest health
- Forest nursery management
- Forest policy
- Innovation in forest products
- Landscape ecology
- Longleaf pine ecology
- Natural resources sociology
- Predator-prey relationships
- Urban-rural interface
- Water quality and hydrology
- Wetland ecology and management
